8 zo o lo gist / zo o lo gi cal		✓

d Complete the text with the nouns and verbs in the lists.

Verbs

carry out clone do prove volunteer

Nouns

clinical trials discovery drugs guinea pigs pharmaceutical companies

Thousands of scientists are employed in

¹ pharmaceutical companies to ² do research into new ³ drugs.

These people hope to make an important ⁴ discovery which will help treat or cure an illness or disease. When a team believes they have developed a new drug, they have to

⁵ carry out experiments to ⁶ prove their theory and make sure

the drug is effective. The final stage of this process is to organize ⁷ clinical trials so that the drug can be tested on humans. People who ⁸ volunteer to take part in these tests are known as ⁹ guinea pigs, after the animals that were used in 19th-century medical research. If the tests are successful, the drug is launched onto the market.

One branch of science that is becoming increasingly important in these companies is genetics. Genetic engineers have already managed to ¹⁰ clone a number of different animals, including sheep, rabbits, and monkeys.

3 VOCABULARY FROM READING

Complete the highlighted words and phrases that express degrees of likelihood.

- The new measures could, in the event, reduce pollution in the city centre dramatically.
- It seems plausible that sea levels may rise dramatically in the near future.
- The idea that we'll ever colonize space seems rather far-fetched to me.
- We're still a long way from finding a source of energy to replace fossil fuels completely.
- Slowing global warming might be achievable if every country cooperates.
- The time when I will be able to afford to stop working is quite a way off.
- The poorest countries still face extreme obstacles to development; for example, corruption.
- The idea that one day cars will fly is not totally implausible.
- It might be possible to see Mars in the sky tonight, if conditions are right.
- There is a real possibility that it might snow tomorrow.
- The theory is only speculative at the moment. Much more evidence is needed before it can be proved for certain.
