

We propose the opening of “The Monthly Menu Cafe,” a small physical cafe designed to foster community engagement through food. Our unique concept centres around a menu that changes completely each month based on direct votes from our customers.

We will operate a cosy, welcoming cafe in the town centre, offering breakfast, lunch, and light snacks. Each month, customers will vote via our website and in-store tablets on a selection of dishes for the following month’s menu. This ensures our offerings remain fresh, seasonal, and directly shaped by local preferences.

Our USP is customer co-creation. Unlike existing cafes with fixed menus, we empower our visitors to decide what we serve. This builds loyalty, encourages repeat visits, and creates a sense of ownership within the community.

Our primary customers will be local residents, students, and professionals seeking a dynamic dining experience. Tourists interested in local and interactive food culture will also be a key audience.

The area currently has several traditional cafés and bakeries. None offer a participatory, changing menu model, which gives us a distinct competitive edge.

We will start with a team of 4: two chefs, one barista/server, and a manager. Dishes will be priced competitively, with a premium for special voted-in creations.

We will use social media, local food blogs, and community boards to promote monthly voting and menu reveals. Opening events and loyalty discounts for voters will drive initial footfall.

We believe this cafe will succeed due to its strong community focus, novelty, and adaptability. By letting customers shape the menu, we ensure continuous relevance and sustained interest.

We are excited about the opportunity to bring this innovative concept to our town and thank the council for considering our proposal.
